services!*

Business Cooperative Services Newsletter

Region 20 Living Science Materials Center

Living Science materials provided to teachers in member school districts (school districts that subscribe to the Living Science Materials program) include over 100 living specimens! Small mammals (hamsters, rats, mice and gerbils), non-poisonous snakes, fish, live frogs, plants, flower and vegetable seeds, micro-organisms, preserved specimen, fertile eggs, prepared petri dishes and distilled water may be ordered by any teacher in participating districts at no cost to the teacher. We will be putting together an advisory committee of member districts to insure that we carry the items and are most needed at the district.

Region 20 Copy Services

This is a service Region 20 started in the summer of 2005. It's designed for districts to submit copy jobs over the web to the Region 20 copy center for production. After the job is complete, it will be delivered back to the district with the weekly van deliveries.

No mess, no problems.

Region 20 Transportation Services

The Region 20 Transportation Services provides instructional training and support services to its member districts. The services are currently offered in Regions 1, 10, 13 and 20. Transportation Services is currently looking into expanding its instructional offerings to include CDL training, defensive driving and transportation department audit/reviews. We will keep you posted.
