

Student System Features

- PEIMS-compliant for reporting required data to the Texas Education Agency
- Ability to extract student data for all PEIMS submissions
- A real-time relational database
- Data access using Open Database Connectivity (ODBC) compliant software
- Update and read-only security at the control of the district
- Laser printing of reports and forms
- User-created reports
- Windows-based screens with online screen-level Help

Operating Equipment

The RSCCC Student system is designed for an SQL Anywhere® database and runs on Microsoft® Windows 2000 Professional, Microsoft® Windows XP Pro, Microsoft® Windows 2000 Server, or Microsoft® Windows Server 2003.

Microsoft® Windows 2000/XP stand-alone computer or client workstation recommendations include: Pentium 1.6 GHz or faster PC, 512 MB RAM, 1 GB hard disk space available, CD-ROM, and CD-RW drive for backups.

Microsoft® Windows server recommendations include: Pentium 733 MHz or faster PC, 512 MB RAM, 1 GB hard disk space available, CD-ROM, and tape backup system (specifics depend on district environment).

TEXAS COMPUTER COOPERATIVE

RSCCC Student System

The Texas Computer Cooperative (TCC) is the leader in the most comprehensive administrative software available for Texas schools.

Currently, over 700 school districts and charter schools throughout the state are ongoing clients of the cooperative's RSCCC software. The RSCCC Student system incorporates state-of-the-art functionality and will significantly increase user productivity.

The TCC formed the Student Advisory Committee (SAC), which consists of student consultants from member education service centers and ESC-20 Information Technology developers, to identify and establish software requirements based on school district needs.

The RSCCC Student system includes Attendance, Discipline, Grade Book, Grade Reporting, Registration, Scheduling, Special Education, and Student Health Assessment, Records, and Evaluation applications. These applications adhere to the SAC's requirements.

We invite you to learn more about each of the Student applications and encourage you to contact your regional education service center for a product demonstration.

A Cooperative Approach with Statewide Support

By being a part of a multi-region cooperative, you are automatically considered a shareholder and a partner. Our partners benefit from the sharing of resources, products, and expertise and help each other fine-tune software needs for optimum availability and performance. Regional training is also available for the entire RSCCC product family, including software release training. Whether you have a technical question, require on-site support, or simply want to learn more about our products, assistance is just a phone call away. Furthermore, support is backed by a statewide network of highly qualified consultants.

Student Applications

Attendance

- Excessive absence tracking and generation of user-defined attendance letters to parents
- Multi-track attendance calendars
- Perfect attendance tracking
- Period-by-period or single class attendance posting
- Reports of special program contact hours and FTEs
- Special populations attendance accounting
- User-defined absence reason codes

Discipline

- Digital photos saved in the database for evidence
- Mass assignment of incident numbers
- Referral system management
- Staff response management
- Student behavior management

Grade Book/Parent Portal

Grade Reporting

- Automatic generation of elementary master schedule and student schedules
- Blank/incomplete/failing grade tracking
- Comprehensive self-paced grade reporting concept
- Current and cumulative weighted grade averaging
- Grade computation and credit assignment
- Individual/group course changes
- Multi-year Academic Achievement Records (AARs)
- UIL eligibility identification

Historical

- Access to a historical student directory
- Historical cumulative reports available by application
- Historical information at district, campus, and student levels in each application
- Multiple school years of historical data

Registration

- Assignment of next year campus number
- Export of all student data to PDAs and handheld PCs including Palm® Pilot
- Export of PID Enrollment Tracking (PET) .xml file for submission to TEA
- Mass reset of specific student information

- Move to Grade Reporting/promotion to next year
- Prior social security number update for PEIMS
- Recording of student's membership in the Optional Extended Year Program for extract to PEIMS
- Retrieval of students from directory
- Student enrollment in and withdrawal from special programs
- Student/scheduling transfers

Scheduling

- An efficient scheduler that processes quickly and produces the best possible student schedules
- Scanning or manual entry of student course requests
- SOLSTAR Resource Allocator (a Master Schedule Builder) or MSALGO that provides information through charts for building sections
- Use of section restrictions to limit or group specific populations

Special Education

- Communication of Individualized Education Programs to parents
- Compliance verification
- Current year/next year data capability
- Recording of special education transportation and related services
- Recording of student's membership in Extended School Year services for extract to PEIMS
- Student profiling

Student Health Assessment, Records, and Evaluation

- Coordination of immunization schedules
- Coordination of screening processes
- Emergency management
- Facilitating of physical exam procedures
- Immunization verification
- Provisional enrollment management
- Referral process coordination
- Screening problem management
- Streamlining of parent information
