

Video Methodologies

(One Day Course)

Course Content

Videoconferencing overview
Technologies
Communications
Standards
Telecommunications Standards
Impact on Deployment
Hardware
Examples
Desktop Videoconferencing Systems
Set-top Videoconferencing
Terminology
Two-way Networked Environment
Video Applications
Peer-to-peer
Small Group
Distance Learning

Hands-on Labs

H.320 V.35 connections
H.323 LAN connections
V.35 to fiber modem connections
H.323 Desktop Systems
T.120 application sharing
Launching multi-cast applications
Internal Codec bridging
Peer-to-peer applications
Small group applications
Large group

OTHER COURSES

- Introduction to Networking
- Advanced Networking
- Basic Troubleshooting with Windows
- Certified Ethical Hacker
- Concepts of Voice over IP
- Designing Layer 3 Switched Networks
- Fundamentals of DNS
- Microsoft Exchange Server 2007
- Network Optimization
- Network Security
- Utilization Training:
Satellite- Delivered
Programming
- Windows Vista
- Windows XP
- Windows 2008 Server Management
- Windows 2003 Server Management
- Wireless Networks
