

Explore the New and Exciting Components of
PowerMediaPlus.com
The Next Generation in Educational Media-on-Demand

Launching in June:

- **More than 4,000 digital audio files, including music, sound effects, audio books, poetry readings, foreign language, and much more.**
Within the audio section, you will be able to search for and retrieve files in the same manner that you currently search for video content. Audio can be streamed live or downloaded to a server, hard drive, or MP3 player.
- **The addition of 15,000 pieces of clip art and photo objects to our Image Library, which currently features more than 10,000 educational photographs and paintings.**
These up-to-date illustrations will be a valuable resource for student reports, school projects, newsletters, and more. The collection of vector images will allow users to incorporate traditional clip art subjects in new and exciting ways.
- **Users will have the ability to browse the Image Library by subjects and subcategories.**
With more than 50 subjects and 300 subcategories to choose from, users can easily search for images that complement their projects.
- **The integration of local content uploads.**
A new database will allow the addition of local content in bulk uploads, providing users with the most time-efficient, personalized management of the system.

By the Start of the New School Year:

- **2,000 additional video titles will be added to our already diverse selection of digital videos.**
PowerMediaPlus.com will feature new digital video collections from such award-winning producers as Rabbit Ears, Janson Media, Boulden Publishing, Linx Educational, and many more!
- **An integrated encyclopedia within your resource search results.**
The encyclopedia will be yet another interactive feature within our system, aiding students and educators in research and further learning.
- **Online training modules will lead you through detailed demonstrations, guided tutorials, and interactive quizzes.**
This teaching system will harness the latest technology to create a user-friendly training component that will engage all users. The online tutorials are in addition to our personal, on-site seminars and phone-based Webinars. We will assess your needs and cater to your organization's specific requirements.
